

**Express food**

## Use case diagram

- Chefs set the menu for the next two weeks and update the system every two weeks.
- The client will display the website daily menu
- When he is ready to order he is either to register for a new account or login for his account
- After login the client will start to choose from the menu and proceed the order
- The client will be directed to the payment page, the order will be calculated and client will pay , if it is a successful payment the customer will redirected to order status page , if the payment is failure client is asked to retry the payment.
- Express food employee will be notified by the successful payment and prepare for the order , and order status will be **"Processing"**
- The chef will start preparing the order
- once the order is ready the employee will prepare it for delivery to let the delivery man collect the order and the order status will change from **"Processing"** to **"Ready for delivery"**
- Delivery man will collect the order and order status will change from **"Ready for delivery"** to **"On the way"**
- Delivery man delivered the order and the order status changed from **"On the way"** to **"Delivered"**.
- Client check the order
- Employee will check the order status

## A list of delivery people

```
SELECT * FROM `employee` WHERE `type` LIKE 'delivery';
```

The screenshot shows the phpMyAdmin interface with the following components:

- Header:** Server: localhost:8889 » Database: express\_food » Table: employee. Navigation tabs include Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, and Triggers.
- Left Sidebar:** A tree view of databases and tables. The 'express\_food' database is expanded, showing tables like address, client, dishes, dish\_menu, employee (selected), menu, order, order\_status, information\_schema, mysql, performance\_schema, and sys.
- Query Execution:** A message states 'Showing rows 0 - 4 (5 total, Query took 0.0003 seconds.)'. The SQL query entered is `SELECT * FROM `employee` WHERE `type` LIKE 'delivery'`.
- Results Table:** A table with 5 rows and 4 columns: id, first\_name, last\_name, and type. All rows have a 'type' of 'delivery'.
- Options:** A section with a search icon and a dropdown menu.
- Actions:** Below the table, there are checkboxes for 'Check all' and 'With selected:' followed by links for Edit, Copy, Delete, and Export.
- Query results operations:** A section with links for Print, Copy to clipboard, Export, Display chart, and Create view.

	id	first_name	last_name	type
<input type="checkbox"/>	6	Jacob	tim	delivery
<input type="checkbox"/>	7	Helen	Hany	delivery
<input type="checkbox"/>	8	Soly	Holy	delivery
<input type="checkbox"/>	9	James	Murphy	delivery
<input type="checkbox"/>	10	Harvy	George	delivery

## An order history for each client

**SELECT \* FROM `order` ORDER BY client\_id;**
